Supersonic Phonics

SPECIFICATIONS:

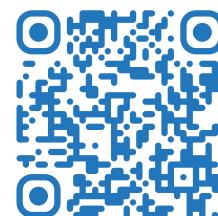

Trim Size: 6½" x 9" Grades: PK-4
Page Count: 32, (40 for White, 48 for Lime)

FEATURES

- 166 fiction titles across 13 levels
- Phonemes organized by level and colour band
- Teaching tips
- Comprehension questions
- Downloadable teacher resources

Supersonic Phonics is organized by level and colour bands, providing a consistent and structured approach that helps guide and support reading instruction. As the reader moves through the colour band levels, the page numbers, word choice, and sentence structure complexity all advance at a rate that encourages development and reading confidence.

Supersonic Phonics begins with the very basics of phonetically decodable reading. Starting with the earliest step of CVC words (consonant, vowel, consonant) and building on this combination slowly, the reader follows a prescribed format supported by the science of reading to encourage reading development. This systematic and sequential approach supports most phonics programs.

Starting with the earliest step of CVC (consonant, vowel, consonant) words and building on this combination slowly, the reader follows a prescribed format supported by the science of reading to encourage reading development. This systematic and sequential approach supports most phonics programs.

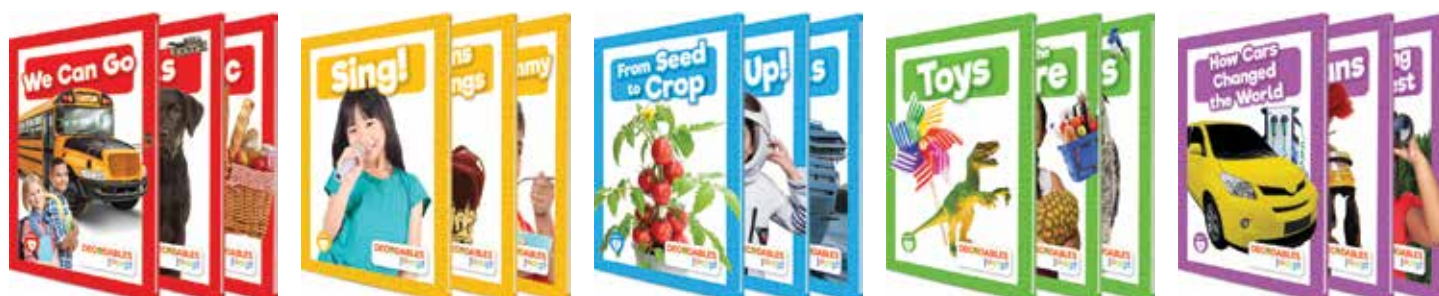

Organized by level and color bands, providing a consistent and structured approach that helps guide and support reading instruction. As the reader moves through the color band levels, the level of repetition and sentence structure complexity advance at a rate that encourages development and reading confidence.
